Proposed BADERIA HEALTHCITY, Raigwan, Jabalpur

Placements 2021

The placements for the session 2021 begins with some of the leading business houses visiting for their talent hiring underlining the sunrise for core sectors.

Training & Placements

Mr. Pankaj Tiwari
Training & Placement Officer
B.Sc., M.B.A.
17 Years Teaching /
6 Years Corporate Exp.

Mr. Harpreet Singh
Training & Placement Officer
BCA, M.A. (Eng. Lit.) M.B.A.
16 Years Teaching Experience

Ms. Niharika Yadav
HR Head
B.Com., M.B.A.
8 Years Experience

The training & Placement Cell of Global Institute of Engineering & Management poises to create the most effective base for the purpose as has been the case since inception. The Training as such constitutes the basic component of the cell which has the onus of making the students employable with an aim to develop them 360 degree by taking the inputs from industries on latest demands. This part takes care of the overall skill and behavior centric development of the students. To name some major efforts which have been taken up on the account of placement, the first exercise starts with invoking of the training need analysis (TNA) and preparing corporate dossier for establishing the selection parameters and understanding the criteria of recruiters. The placement cell of the institute contacts, proposes, lives up and receives the companies on the specific dates for conduct of the drive.

Our placement cell, as against the general trend, has been successfully instrumental in bringing Core Mechanical, Civil & Electronics Companies for the recruitment of the students. The placement drives so far have testimony to the fact that despite the economic slump we have been able to call the companies for all Engineering branches including MBA to come and recruit the students on a decent compensation. The placement team of Global is an assortment of trained talented professionals boasting of serious industrial and academic credentials in different vertices of business. The Team members bring with them the know-how, loads of experience, expertise and flexibility to hand holds the students & recruiters both.

Placements @ 2020-21

The year 2020-21 saw 23 Companies offering On Campus opportunities to our Students for placements till 30th June 2021 for different branches of B.Tech. & MBA. The process of Campus recruitments is still going on...

Civil Engineering

Civil Engineering is inarguably the oldest engineering profession in the world. What culminated out of mankind's basic need for shelter has stretched its scope well beyond its original purpose. Structures ranging from enormous dams and stupendous bridges spanning across the wildest of the earth's rivers to the multi-storeyed skyscrapers kissing the firmament, bear testimony to the fact. With today's changing scenario, the basic challenges to our society that require civil engineering talent are increasing in number and importance.

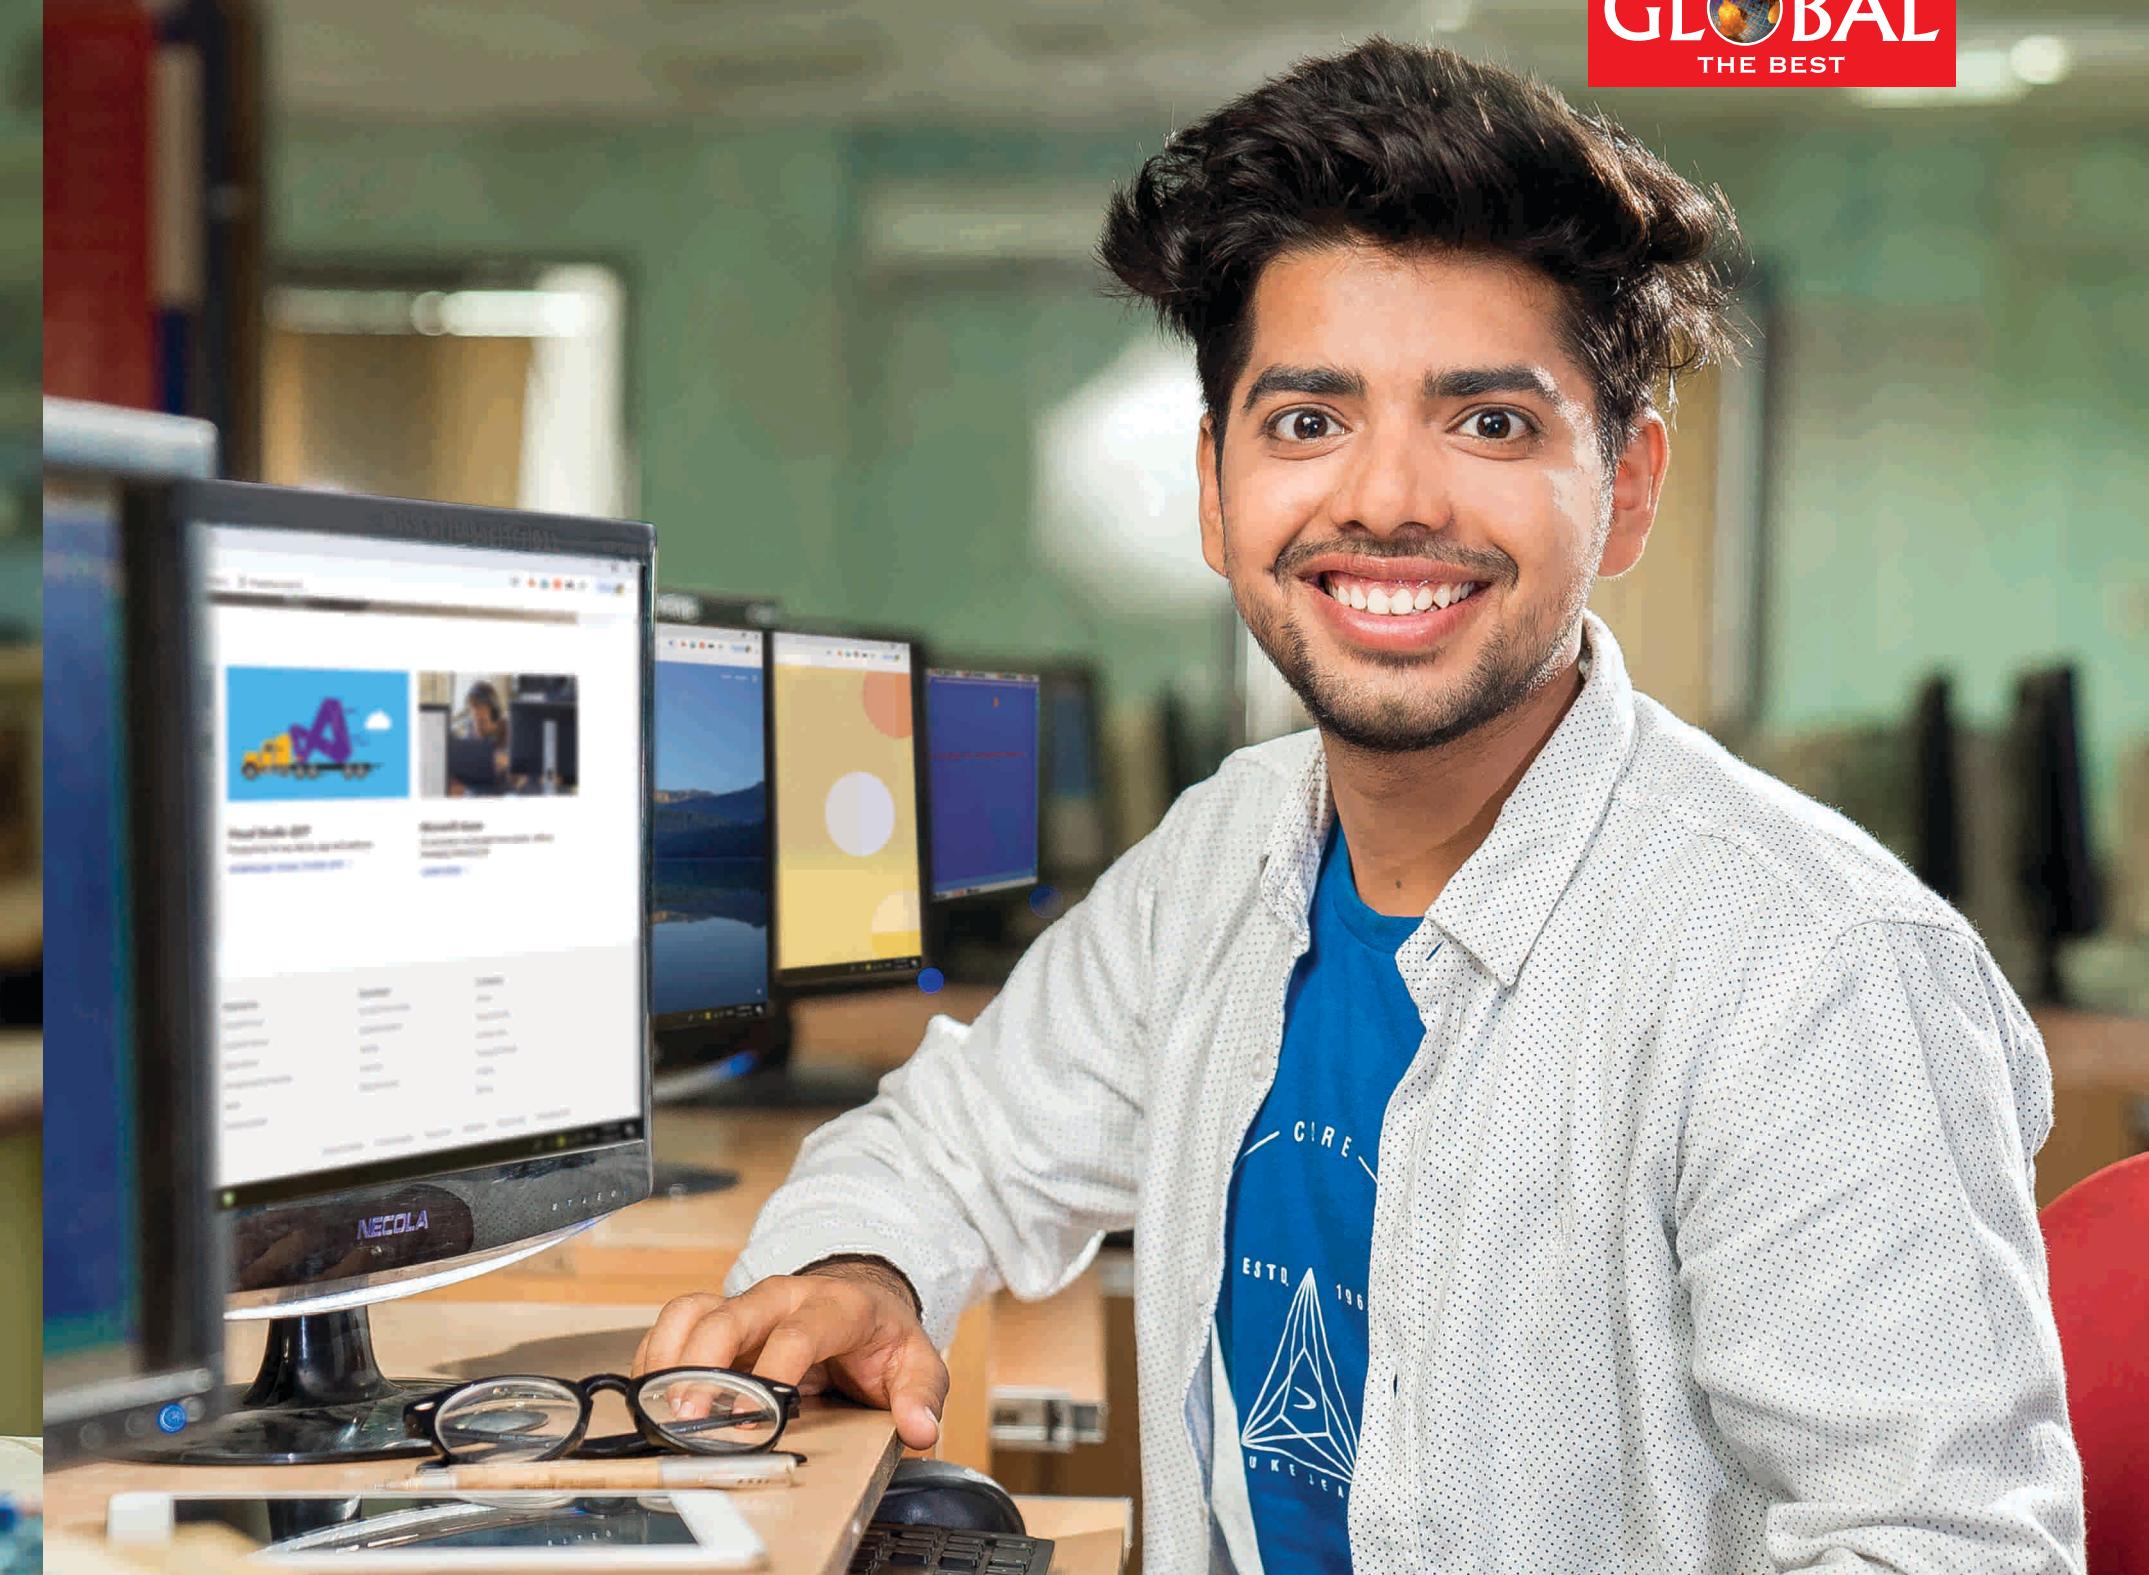

Mechanical Engineering

Mechanical engineering is known as "EVER GREEN" branch of engineering. The engineering profession has been greatly enhanced by the design, manufacturing, operation and maintenance of all kinds of machineries. Mechanical Engineering is related with the design, manufacture, operation & maintenance of all types of machineries like steam engines, internal combustion engines, gas turbines, steam turbines, power plants, agriculture machines, machine tools (like Lathe, Milling, Shaper, Drill, Planer, Welding Sets, CNC machines etc.), refrigerators, air conditioners, coolers, cement plants, steel plants, textile machinery, paper mills and so on.

Electronics & Communication Engg.

During the last decade there has been a communication revolution and the society is moving rapidly into an information oriented era based on new communication technologies. The course introduces the students to the fundamentals of communication and electronics theory, provides practical and applied skills for inculcating rational, scientific and critical thinking. The highlights of major subjects taught in the field of communication include fundamentals and applications of Digital Communication, Fiber Optics, Satellite Communication, Modern Telecommunication techniques in addition to Computer Aided Communication and Software Skills.

Computer Science & Engineering

Increasing applications of computers in all areas of human endeavour have resulted in a vibrant industry with constant change in technology. The course broadly covers how computers operate and how to programme them, usage of computers, database and computer networking design, development and maintenance of computer software. We have fully air conditioned computer labs installed with 620 computers loaded with latest version of application & system, connected with Wi-fi network, Internet through broad band and necessary peripherals are also provided to keep the students up-date. In addition we are also having TCS-ION computer center having 1320 computers under a single roof in our campus. All the systems are backed with high power security & safety features.

Information Technology

Information Technology is a general term used to describe technologies that help produce, manipulate, store, communicate, or disseminate information. Information Technology includes all matters concerned with the furtherance of computer science and technology with the design, development, installation and implementation of information systems & applications.

In difficult economic times, going back to school to build new skills - and make yourself more attractive to future employers - becomes extremely popular, even for people with full-time jobs. MBAs are especially popular since the degree is usually meant to prepare someone for more advanced, leadership roles in business (or even government). A successful candidate can truly gain several benefits in pursuing an MBA degree not only for his personal development but for his professional career as well. For one thing, one can acquire additional knowledge on business and a wide range of relevant aspects. The MBA program and business schools usually teach business strategies and concepts, in theory and in reality. Since an MBA course normally requires training and internship in some companies, a student will surely learn to use his skills in reality and in the daily business operations.
